Item # CT500, Condensate Tanks

We manufacture a variety of condensate tanks. Many of our tanks are replacing existing leaking units that were designed without corrosion allowance. We begin with a 1/4-inch minimum thickness on all sizes of condensate receiver and often use 3/8-inch thickness. When buying a system with pumps, motors, or gauges, don't forget that the tank is an integral part of the system. You can protect your system by buying a tank with corrosion allowance from Midwest Tank Co.

Specifications

Capacity	500
Length (A)	7'-0"
Diameter	3'-6"
Dim. (C)	3'-6"
Dim. (D)	2'-0"
Dim. (E)	12 in
Low Pressure Return (F)	4 in
Dim. (G)	2 in
Dim. (H)	2 1/2 in
Hi Pressure Return (I)	2 in
Dim. (J)	2 in
Tank Heater (K)	2 in
