Item # HW6060, Hot Water Storage Tanks

Available in 100, 125, and 150 PSI design pressures.

Other sizes are available upon request. The diameter must be in 6-inch increments. The length of the shell may be manufactured to whatever length is necessary to achieve the desired capacity. Please call Midwest Tank for optimum sizes. Number of openings and sizes may be located on the drawing worksheet. There is no limit on quantity or size of openings. All openings larger than 2" will be 150# flanged openings. All openings 2" and less will be 3000# threaded couplings. A standard manhole is 12 inches by 16 inches. Other manhole sizes are available. Hot water coils are optional.
