**Vertical Non-Pressure Tank**

This tank is a vertical non-pressure tank manufactured with 316L stainless steel for water storage. This tank has  $\frac{1}{4}$ " side wall with a  $\frac{1}{4}$ " bottom and  $\frac{3}{16}$ " thick top. It was designed with a flat bottom that will rest on a concrete slab. The top was designed with a conical top to shed rain water and to bolster the strength of the roof. The view shows the top of the tank with a gooseneck vent and a couple of 150# flanged openings. This tank has a mill finish on the exterior and interior.
